Where prices are quoted 2 - 25¢, or 3 - 80¢; that is just what it means - - please do not split these offerings. Where varieties are listed per 10 you may order 5 at the 10 rate. When ordering small sizes do not ask for less than 10 bulbs where price is quoted 10 - 60¢.

If you order from both the 100 List and the Retail List we will send your bulbs collect, and put in enough extras to offset the transportation of those bulbs ordered from the Retail List.

MINIATURES, give them a try. They bloom earlier than the larger type varieties. You will find more charm and graceful arrangements from these little fellows.

ARE YOU BOTHERED WITH MOLES OR WIREWORM IN YOUR GARDEN ?

We plant on new ground every year, for the most part acreage which has overrun it's time giving good assurance that the moles and wireworms have become well established. Up to the time of the advent of ALDRIN we used 50% D.D.T. dust in the rows at planting time, with good results. ALDRIN is safer to handle, results are tops. Sprinkle a level teaspoon full of ALDRIN along four feet of your trench at planting time, well mixed in, see if your mole and wireworm trouble doesn't disappear, bet it does.

WASHINGTON STATE CUSTOMERS - If bulbs are not purchased for RESALE or TO GROW FOR THE SALE OF CUT FLOWERS, be sure to add the REQUIRED 3 1/3 % State Sales Tax.

If you enclose transportation charges with your order be sure to put in enough, we determine the correct amount of transportation charges before mailing out your order and should you send too much to cover the cost you will find a cash refund in the package when you receive it.

We wish to thank our many customers for the fine letters we receive, showing their appreciation of the fine bulbs they received and how pleased they were with the way their orders have been handled. Also the good results they have had in growing bulbs purchased from us.

Trials and tribulations of the Gladiolus Bulb growers in both Oregon and Washington could make quite a book, for the seasons of 1954 and 1955.

We like a good many other growers in both Oregon and Washington was hit pretty hard by the early freeze in November. Not a bulb in the ground at that time was saved. Consequently our offerings per 100 is short of many varieties and sizes.

On account of this freeze we have had to be very conservative in our offerings to insure ourselves enough planting stock to take care of our plantings for 1956. On bulblets we have some available in the peck and bushel, many by the quart. To get an accurate inventory and list these would be quite a chore, however, if there are varieties we have listed by the 10 or 100 that you would be interested in, drop us a card and we will do our utmost to see that your needs are taken care of.

We especially want to take this opportunity to thank our many customers who have not waited for our 1956 Spring list to come out before sending in their orders. In some cases due to lack of sizes it has required quite a bit of letter writing, but we feel you have been wonderful people and most co-operative and lenient. We all hope that 1956 will be much more kind to all the growers and we will once more be able to grow in confidence with more pleasing results for the season's labor.

As one grower wrote me in his Christmas Greetings, "May the growing season of 1956 be much brighter than the present outlook after the trials of 1955"

Shipments on orders out of state, especially to the east will not be made unless weather conditions are favorable, or the purchaser insists on immediate delivery. A special commodity rate has been established by the Railway Express Agency on bulbs shipped from the Pacific Northwest which is about 20% under the prevailing second class rate that has applied to bulbs. We determine prior to shipping as to whether it is the cheaper via Express or Parcel Post. In most instances on packages weighing 12 pounds and over it is just as cheap (and insured against loss and freezing) and some times cheaper, to ship via Express.
